SUMMARY

A motivated software developer with experience in popular development technologies. Fluent in English and Arabic, with basic French. Driven to learn and tackle new challenges. See my work on GitHub or learn more on my LinkedIn.

WORK EXPERIENCE

Part Time Coding & Robotics Instructor

Feb 2026 - Present

Currently teaching coding and robotics to students aged 5–17, delivering engaging and age-appropriate lessons across a range of technologies and platforms. Topics include MIT App Inventor (mobile development), Scratch, ScratchJr, block-based programming, HTML, CSS, JavaScript, Bitsbox, and mBot robotics using Python. Focused on developing students' problem-solving skills, logical thinking, and creativity through hands-on, interactive learning experiences.

Power Platform Developer Intern at VN3XT Technologies

Dec 2025 - Feb 2026

Completed a 3-month internship working with Microsoft technologies including Power Apps, Power Pages, Power BI, Copilot Studio, and Dataverse. During this time, I designed and developed a Customer Relationship Management (CRM) model-driven application, implementing authentication and authorization features. The project served as a simplified version of a full CRM system, demonstrating core functionalities of model-driven apps and secure user access management.

Full Stack Web Developer Intern at Integrated Digital Systems (IDS)

Jul 2025 - Sep 2025

Completed a 2-month project developing a Smart Meeting Room web application, where I took full ownership of the system design and implementation. The project included building secure authentication, managing multiple user roles, and implementing various features tailored to each user type. The application was developed using Laravel for the backend and Vue.js for the frontend.

EDUCATION

Bachelor Degree in Computer Science

Nov 2022 - Apr 2026

Antonine University, Baabda

- Developed a strong foundation in algorithms, data structures, and computational theory to solve complex programming challenges

Piscine

Jul 2025 - Aug 2025

42 Beirut, BDD

- 4 intensive weeks of coding with C language and learning how things work in low level.

Core Curriculum at 42 Beirut

october 2025 - present

42 Beirut, BDD

- Accepted as a student at 42 Beirut, currently pursuing the Core Curriculum in software engineering.
-

TECHNICAL SKILLS

- **Web & mobile dev:** html, css, JS, TS, React, php, Laravel, dotNET core
 - **Programming Languages:** C, C++, python, java, javaFX
 - **DataBase Technologies:** mysql, noSQL, plsql, mongoDB
 - **General:** linux fundamentals, docker, Git, Cloud services
-

- **Languages:** English, Arabic, French
